

MIS analyze information, organize it, categorize it, structure it, manipulate it, and display it so others can use it — easily and intuitively — are increasingly valued in business and government organizations. These professionals are the new architects of the information age.

Master of Information Science
INFORMATION IS A STRATEGIC RESOURCE

The Master of Information Science (MIS) degree program requires 42 graduate credits. An interdisciplinary professional program, the MIS is designed to prepare students for lifelong careers in designing, managing, evaluating or consulting about information technologies and services.

The SLIS Master of Information Science degree program was established in 1995. We have an enviable track record with over 300 graduates employed in a wide range of challenging careers in the US and abroad.

The recently-upgraded Mac Lab provides an ideal classroom setting, as well as a work and study space for students.

MIS ALUMNI FIND THEY HAVE A COMPETITIVE ADVANTAGE IN THE SHIFTING JOB MARKET PLACE

Business, industry, government, education and community organizations are recognizing the need to manage and use information as a strategic resource. Consequently, there is a growing market for professionals who can create, organize, design and manage information resources so that they work well for the myriad ways that people use information systems.

At Indiana University, SLIS prepares its MIS graduates to manage new areas of responsibility and become leaders with professional depth and discipline. We'll teach you the leading theoretical models and analytical skills — the flexible foundations of your future — along with the technical and professional competencies necessary for a dynamic career. We can do this because we are a highly ranked school with an active and productive faculty.
