

6 October 2010

Chair  
Department of Chemistry  
Case Western Reserve University  
Cleveland, OH 44106

Dear Colleague:

I am requesting your assistance in bringing our graduate program in Toxicology to the attention of your undergraduate students. The enclosed brochure provides a brief overview of faculty research interests in our interdepartmental Center in Molecular Toxicology. Please display the brochure where your undergraduates will have access to it. To obtain more detailed information about our facilities and graduate program, please visit our website:

**<http://www.toxicology.mc.vanderbilt.edu>**

Enhancement of facilities and personnel over the past few years has developed our Molecular Toxicology program into one of the best in the nation, offering students excellent academic and research experience in toxicology. Students in this program participate through the departments of Biochemistry, Biological Sciences, Chemistry, Medicine, Neurology, Pathology, and Pharmacology. Each year we make every effort to attract students with outstanding ability, and we greatly appreciate your help in informing students of this opportunity.

Sincerely yours,

F. Peter Guengerich, Ph.D.  
Harry Pearson Broquist Professor of Biochemistry  
Interim Chair of Biochemistry  
Director, Center in Molecular Toxicology
