

STOWERS INSTITUTE®
FOR MEDICAL RESEARCH

Stowers Institute Scholars Program

June 1 - July 31, 2009*

in

Kansas City, Missouri

The 2009 Scholars Program is an intensive research experience in a stimulating scientific environment with state-of-the-art laboratories equipped with the most advanced technology. Serious science students will benefit from our commitment to training in a unique environment that emphasizes an interdisciplinary approach to research.

Successful candidates are undergraduate students enrolled in a degree-granting program in biology, biochemistry, molecular biology, genetics, chemistry, physics, computing, engineering, mathematics or a related field. They will have completed 60 credit hours of undergraduate coursework with at least a 3.5 GPA.

Scholars work under the direction of a scientist at the Stowers Institute for Medical Research on a specific project with defined objectives. Scholars receive a \$3,000 stipend, and non-Kansas City residents may apply for a housing allowance.

For more information or to apply, go to Training Programs at www.stowers.org and submit the following to studenttrainingprograms@stowers.org:

1. Pre-employment & Certification Forms
2. Statement of Interest
3. Official transcripts of undergraduate work
4. Letter(s) of recommendation from advisor(s)

All materials must be received by February 27, 2009.

Join us for this exciting program if you're interested in broad-based interdisciplinary research directed at understanding the genetic and molecular mechanisms that control fundamental processes of living cells.

*Special arrangements may be made for an extension of the training period.

The Stowers Institute is committed to equal opportunity in all of our programs.
