

C2B2 Colorado Center for Biorefining and Biofuels

Research Experience for Undergraduates

The Colorado Center for Biorefining and Biofuels (C2B2) is pleased to announce the second annual Research Experience for Undergraduates Program (C2B2-REU).

C2B2-REU students will conduct research projects at C2B2 partner institutions including; the University of Colorado, Colorado State University, Colorado School of Mines and the National Renewable Energy Laboratory. Undergraduates will work with a C2B2 project investigator on a research project in the field of biorefining and biofuels.

This summer research program will focus on fundamental scientific challenges relevant to the renewable energy industry. Research disciplines extend from plant biotechnology and biochemical and thermochemical conversion technologies to process, product, and systems analysis and engineering.

Apply now!

C2B2 invites applicants from all disciplines relevant to renewable energy research. Visit www.c2b2web.org to submit an online application. Application materials are due by **March 1, 2009**.

Program Dates

June 1-August 7, 2009

Program highlights:

- Seminars and luncheons
- Poster session
- Graduate and post doctoral research mentors
- Social and recreational activities

Financial Provisions

- \$4000 ten-week stipend
- \$1,800 food and lodging allowances
- \$500 in travel expenses

Summer 2008 C2B2-REU students

About C2B2

The Colorado Center for Biorefining and Biofuels (C2B2) combines the expertise of more than 100 principal investigators at the CU, CSU, CSM, and NREL, in addition to the insight of over 30 industrial sponsors for the purpose of advancing research, training, and innovation in the field of biorefining and biofuels. C2B2's advanced integration offers unsurpassed research and educational opportunities for students, researchers and industry.
